Furnaces

American Standard home furnaces are designed to help keep your home warm and cozy during the colder seasons. Each furnace is built with efficiency and reliability in mind so that you and your family can enjoy consistent warmth and long-lasting comfort. However, selecting a gas or oil furnace isn't a one-size-fits-all decision.

American standard knows that one residential furnace might not cover the needs of every customer. That's why a variety of gas and oil furnaces are available to choose from. Have a look at what American Standard has to offer.

Safe and Simple

The furnaces offered by American Standard offer reliable comfort and are, most importantly, safe and simple when it comes to operation. Furnaces come with hot surface igniters which mean the burners start electronically. No fuel-burning pilot lights. Multi-port in-shot burners are also employed to make sure you're getting the maximum heat while using the least amount of fuel.

Pick the Right Furnace

It can be difficult knowing which residential furnace model is right for you. Do you go with the best of the best and go Platinum or do you go with the solid and durable Silver series? Let American Standard help you make that choice. Get in touch with a local dealer and learn the benefits of oil and natural gas furnaces.
